\*Competitive Division - First 2 weeks of play are considered "pre-season" record for the final 7 weeks will determine tournament seeding.

-Players can be added to the roster until week 4. After week 4, no more players can be added to the roster and no additional substitutes can play unless already on the roster. Players must play in at least ½ of the games to be eligible for tournament play. (4 matches for each league) Each league will have a tournament. As a reminder for substitutions during the game: If subbing in you can sub into the center back position, in a continuous rotation or a sub (A) can take an existing player (B) position. The returning player (B) must go in for the player (A) that took their position. Teams must be consistent each game on which type of subbing they will use.

-Please do not to bring your children to the games. Not only is it a distraction to the players but also a liability.

-The team registration fee (\$120), registration, team roster and a covid waiver must be turned in before you can play. I will be there the first night to collect everything.
